

Summary

Software Developer with 6+ years of combined experience in professional software engineering and Unity-based systems development. Strong C# programmer with a background in Java and full-stack web technologies, experienced in architecting maintainable systems, debugging complex issues, and deploying reliable software for both enterprise and real-time interactive environments. Passionate about user accessibility, clean code, scalability, and cross-disciplinary problem-solving.

Experience

Independent Unity Developer

Apr 2022 – Present

Designed and built games and prototypes using C# and Unity, focusing on UI, gameplay systems, performance, and multiplayer networking.

- Synth Race (Steam, 2025) – 3D Online multiplayer racing game – [Showcase](#)
 - Implemented player movement, physics, and collectible systems.
 - Integrated Steamworks API for matchmaking, leaderboards, and achievements.
 - Built 20+ modular levels using ScriptableObjects, Custom Inspectors, and reusable data pipelines.
 - Delivered stable online sessions through efficient relay-based networking and optimization.
 - Developed custom editor tools to speed iteration and improve design-engineering collaboration.
- First Person Shooter (Personal Project, 2025) – Archived – [Showcase](#)
 - Developed a modular first-person full-body system with a single humanoid rig and custom transform overrides for consistent pose control.
 - Implemented smooth cutscene-to-player control transitions and a staged firearm reload system.
- Third Person Shooter (Personal Project, 2022–2024) – Archived – [Showcase](#)
 - Created modular AI driven by RNG and player states, puzzle-solving mechanics, grid-based inventory, quest dialogue branching, and weapon upgrades.
- 2D Precision Platformer (Game Jam, 9/2025) – [Itch.io](#) | [GitHub](#)
 - Implemented character physics, game logic, and UI; collaborated with designer, artist, and musician.
 - Fun Factor ranked 3rd out of 15 entries
- 2D Top-Down Stealth (Brackey's Game Jam 2, 9/2025) – [Itch.io](#) | [GitHub](#)
 - Developed character controller, AI vision cones, detection logic, stealth/gameplay mechanics, and UI; collaborated with artist and musician.
 - Gameplay ranked 389 out of 2,285 entries

Computer Science Tutor

Tutor.com — Dec 2022 – Nov 2024

- Taught 10+ students weekly in C#, Java, and backend fundamentals.
- Simplified debugging, OOP, and data structure concepts to prepare students for internships and coding interviews.

Software Developer

JPMorgan Chase — Oct 2018 – Apr 2022

Full stack developer responsible for developing and maintaining corporate banking management front and backend codebases.

- Enhanced transaction system compliance by adding Cyrillic character support and integrating with an external verification service to ensure Russian sanctions screening before transaction approval.

- Created NoSQL database and implemented logic in Spring Boot microservices to support Saudi Arabian government transactions and account management.
 - Integrated universal authentication service to replace in-app login logic and centralize corporate banking user verification.
 - Supported full and rolling deployments by analyzing logs and resolving deployment failures.
 - Delivered 90%+ test coverage using JUnit/Mockito while maintaining 100% passing rate.
 - Collaborated with cross-functional developers in an Agile environment to deliver production-ready features and system improvements.
-

Education & Certifications

- Unity Associate Programmer Certification – 2025
 - Full-Stack Developer Bootcamp, Revature – 2018
 - B.A. in Biology, Minor: Math & Chemistry – University of Redlands
-

Technical Skills

- Languages: C#, Java, JavaScript, SQL, NoSQL
- Frameworks & Technologies: Unity Engine, Spring Boot, .NET (Core/Framework), Ember.js, REST APIs, CI/CD Pipelines
- Unity and Game Dev: Animator, Timeline, NavMesh, Inverse Kinematics, uGUI, ScriptableObjects, FSM, Custom Inspectors, Animation Rigging (Unity IK), Vector/Quaternion Math, Profiler, LODs, Steamworks API, Profiler, Microverse, Animation Designer, Physics, Coroutines,
- Core Competencies: Object-Oriented Design, Game and Systems Architecture, Debugging, Performance Optimization, Agile Development
